

Titan

Flexible Series Secondary Drain Pans

Used when space requirements are tight, the Titan Flexible Series Secondary Drain Pans are more flexible and durable than fabricated metal or plastic pans.

Created from our patented blend of advanced polymer DexElar® material will not rust, crack, split or leak like a traditional fabricated metal secondary drain pan. DexElar® material provides extreme temperature durability (-40°F to 260°F), high tensile strength and is self extinguishing.

Titan pans are manufactured with rolled edges and no seams for superior one-piece structural strength and flexibility. They are also specifically designed and engineered to be completely compatible with our Goliath Furnace Series Furnace Risers to create a complete and professional HVAC installation.

Made with Pride in the USA, Titan Flexible

Series Secondary Drain Pans are compatible with our AG-4200 Condensate Management System water sensor and drain adapter. (Sold separately)

Titan Pan shown with optional Goliath Furnace Risers
