

Peace of Mind

Comfort & Efficiency

Control

Your local Amana brand contractor can now offer you an automated remote access option for your Amana brand comfort system. If you are already using the Amana brand mobile app to control your home's thermostat, you can now authorize your contractor to remotely access your comfort system's performance (via the Amana Cloud Services) to provide you with extra peace-of-mind, comfort, efficiency, and control.

Peace Of Mind

- When you authorize remote access of your system, you get peace of mind that diagnostic data about many system issues are available to your contractor remotely.
- With remote access, issues with your system can be identified and diagnosed remotely, often before you are even aware of an issue.
- In many cases, contactless service is possible since service and adjustments to your system can be made remotely, without sending a technician into your home. Whether it is a small change to your thermostat schedule; or a more technical system adjustment, your contractor can access your system remotely, and you don't even have to be home!

Comfort and Efficiency

- Comfort systems that are not operating properly have more service needs, reduce your level of comfort, and don't run efficiently. Remote access can help ensure your system is always delivering the comfort you expect.
- System performance is a major contributor to operating efficiency, and higher operating efficiencies can help lower your utility costs. Remote access can help keep your system efficient and those utility costs in check.

You will always be in control

- **Choose what level of access to give your contractor,** either view only or view and adjust system data only or full remote adjustment. You can even choose to allow remote access for a brief 2-hour window when service is called for.
- **Your data is always protected and safe.** Your data privacy and protection is our highest priority. You can end your contractor's remote access at any time.

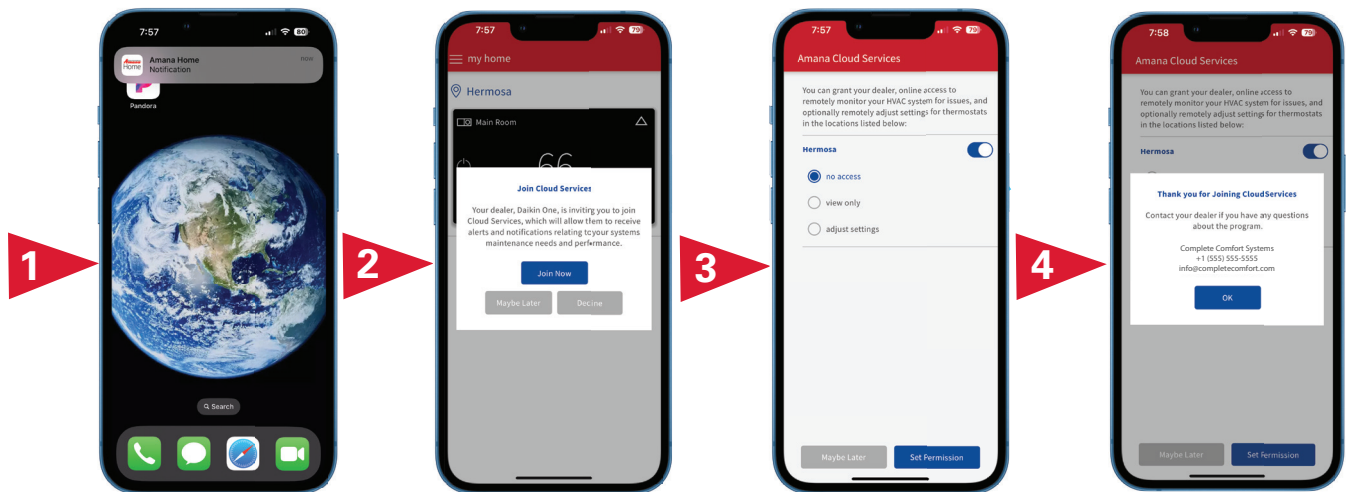

To sign up:

1. Provide us with the email address you used when you registered your Amana Home mobile app.
2. Soon you will receive a notification on the app, asking you to join.
3. Accept the invitation, select what level of access, view only or view and adjust as you prefer.

Here's how to accept the Amana Cloud Services invitation:

- Make sure your Amana Home mobile app is upgraded to the latest version (v2.1 or higher)
- Follow the steps (see below) and enjoy!

1. Your contractor will send out an invitation and you'll receive a push notification on your phone.

2. Click the push notification, "Join the Amana Cloud Services Program" message that will pop up. Then, click "Join Now".

3. Enable each location you want connected to Cloud Services, and select the desired permission level to grant your service provider.

4. A "Thank you" message will appear to confirm you are successfully enrolled.
