Goodman
Air Conditioning & Heating

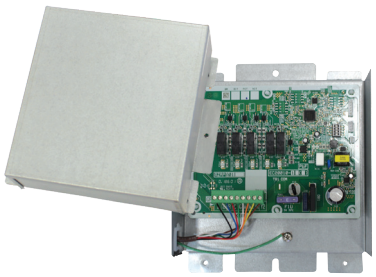

Goodman D24V Gateway

Connecting Goodman SD Systems to any Gas Furnace

When a full system replacement is not a chosen option, a partial Goodman SD (Side Discharge) system is now a possibility. The D24V Gateway offers a great comfort upgrade solution for homes with existing heating/furnaces.

The D24V Gateway allows you to connect to any noncommunicating gas furnace when a communicating indoor unit is not a chosen option when installing with the Goodman SD condenser and coil. The D24V Gateway is compatible with the following:

- Goodman SD AC/HP ODU
- CAPEA/CHPEA/CAHEA EEV Coil
- Goodman GTST thermostat
- Clean Comfort line of IAQ solutions compatible

For more information on IAQ products visit www.cleancomfort.com.

Goodman SD Smart Thermostat

GTST-CW-WH-A

D24V Gateway

DTA119A73

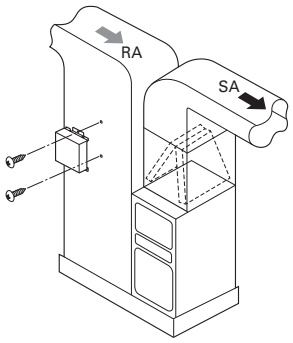

Enjoy the fantastic features of Goodman SD inverter unitary outdoor unit! As low as 56dBA sound, compact footprint, lightweight, swing compressor, Blue Fin corrosion coating and multiple mounting options (wall, 4" from wall, patio, balcony, stackable). Learn more at www.goodmanmfg.com/products/air-conditioners/gsxs6.

Quick Mount

Mount the D24V Gateway adaptor (DTA119A73) on a place which has sufficient strength and stability. To avoid damage to the DTA119A73, DO NOT mount the adaptor to any:

- Supply duct.
- In a place that has risk of vibration or water droplets.
- Directly to any air handler, furnace, hot water coil or evaporator coil in the area.

Dehumidification

Field selectable dehumidification settings to accommodated homeowner preferences

- It is recommended to use setting "B" as a starting point and adjust as applicable for region or customer preference. Refer to page 12 of the installation manual.

Compatible only with the following items: Goodman SD AC/HP, CAPEA, CHPEA, or CAHEA cased coils and Goodman GTST Connected thermostat. North and Southeast models only.
